

Step by Step Measurement

A. Find your band size (ribcage)

Wrap a measuring tape snugly below your bust where your bust meets the top of your ribs. Ensure the tape is level to the floor, straight, and free from any twisting. Give an exhale before checking out your measurement.

B. Find your bust size (fullest part of the breast)

Wrap the measuring tape to sit gently around the fullest part of your bust. This is typically across the back where the top of your bra would sit, and across the breasts. Ensure the tape is level to the floor, straight, and free from twisting.
