

# Mounted Table Top Scissors

**PTT-1/PB | PTT-1/WB**

Designed for use by children with very limited strength and control, or for use one-handed. Either with a brightly coloured green plastic base which provides stability whilst keeping the product lightweight, or a solid wooden base to give ultimate stability. Simply push the paper or card along the base until in position, then push down the "T" shaped handle to cut. The hidden spring will automatically reopen the blades in readiness for the next cut. It is often advantageous to use the more dextrous hand to manipulate the paper whilst the more affected hand works the scissors.

NOW SUPPLIED IN  
HANDY ZIP CASE

PTT-1/PB

PTT-1/WB

**OUR OT FINDS THESE GOOD FOR...**

- ✓ Weak hand or arm strength
- ✓ Poor motor control
- ✓ Tremor
- ✓ One handed operation.  
For example, children with Cerebral Palsy or Congenital Limb Deficiency
- ✓ Stable base and option of using the forearm if joint protection of the fingers is necessary. For example, children with Arthritis.
